POINT Mobile

PM600

Android™ based cash register

✓ Modern stylish design
✓ 10 inch touch screen display
✓ 58 mm fast, reliable thermal printer
✓ Customer display
✓ Completely noise free
✓ Easy maintenance and service
✓ Multi-touch display

Advantages of capacitive touch:

- super sensitive touch, much better user experience than using resistive touch,

- supports multi touch,

- hard surface is very durable against wear and scratches, while resistive has plastic surface that is easily worn out,

- no calibration necessary, maintenance free,

- true flat zero bezel surface is splash and dirt proof,

- much better picture clarity, no obstructive layer between display and observer.
